# Icebath / hot tub

Heat or cool down your tank

The ideal reversible heat pump for swimming pools up to 35m<sup>3</sup>.

Even more efficient, the Nano action Reversible outperforms all its rivals thanks to its reversible mode able to operate until -5°C.

With its 32/38mm and 1" connectors, it can be connected in just a few seconds to any standard filtration system, be it an above ground or in ground swimming pool, or a spa.

Simply plug in your heat pump and let your swimming pool get warm (up to 40 degrees) or cool off (down to 8 degrees).

# PRO HEATER / COOLER

Heat or cool down your tank

ISBLOK is a powerful water cooler, powerful enough to quickly cool even larger pools. A tank/bath of 1000 liters is cooled to just above freezing point within 3 to 4 hours. scroll down for more info.

ISBLOK consists of the highest quality components. As a result, the machine has an expected lifespan of at least 8 years based on daily use.
